Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 11-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese Patent No. 09123821A to Hiromitsu in view of U.S. Patent No. 5,165,646 to Gewecke. Hiromitsu discloses the claimed invention of a cup holder including a receiver device 6 which is pulled into and out of the housing 5 and is connected to the air conditioning system duct 4. However, Hiromitsu does not disclose the air directing device to include two inflow ducts. Geweck teaches a cup holder 20 which is connected to two inflow ducts V1 and V2. Thus, it would be obvious to modify Hiromitsu so that the cup holder is connected to two inflow ducts, in view of Gewecke, with the predictable result that the beverage containers which are held in the cup holder are quickly and evenly cooled. It is well known to provide automobiles with air conditioners that can be switched between heating and cooling. It is considered that the air conditioning system of Hiromitsu inherently includes such a heating and cooling system.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
